Introduction

Charter schools in Idaho operate on 5-year terms as defined in a Performance Certificate executed between the school's board and its authorizer. In addition, Idaho law requires that every certificate includes a framework describing the expectations the school must meet in order to earn a next operational term. It also requires that charter school authorizer's complete performance reports for the schools they oversee each year. The annual performance report serves the following purposes:

1. To provide transparent information about charter school quality to the public;
2. To ensure charter school boards have access to clear expectations and;
3. To inform mid-term authorizing decisions.

This report reflects how the school's outcomes during the most recently completed school year measure up against the expectations established in the framework. At the end of each 5-year term, the authorizer reviews the school's annual reports and financial data to inform its decision to renew, conditionally renew, or non-renew, the school for a subsequent term.

Each measure included in the IPCSC's framework has a meets standard benchmark. A school that meets standard on all measures at the end of its current operational term is guaranteed an unconditional renewal. A school that does not meet standard on at least one measure at the end of its current operational term may be conditionally renewed or non-renewed. Because the outcomes on this report inform high-stakes decisions, schools are encouraged to use this information to support their strategic planning efforts each year.

COVID-19 NOTE: Please note that due to the COVID-19 pandemic, the IPCSC has suspended ratings (exceeds, meets, etc.) on academic and financial measures for the FY21 report. All outcomes are included in this report; however, outcomes are not rated.

Academic Outcomes

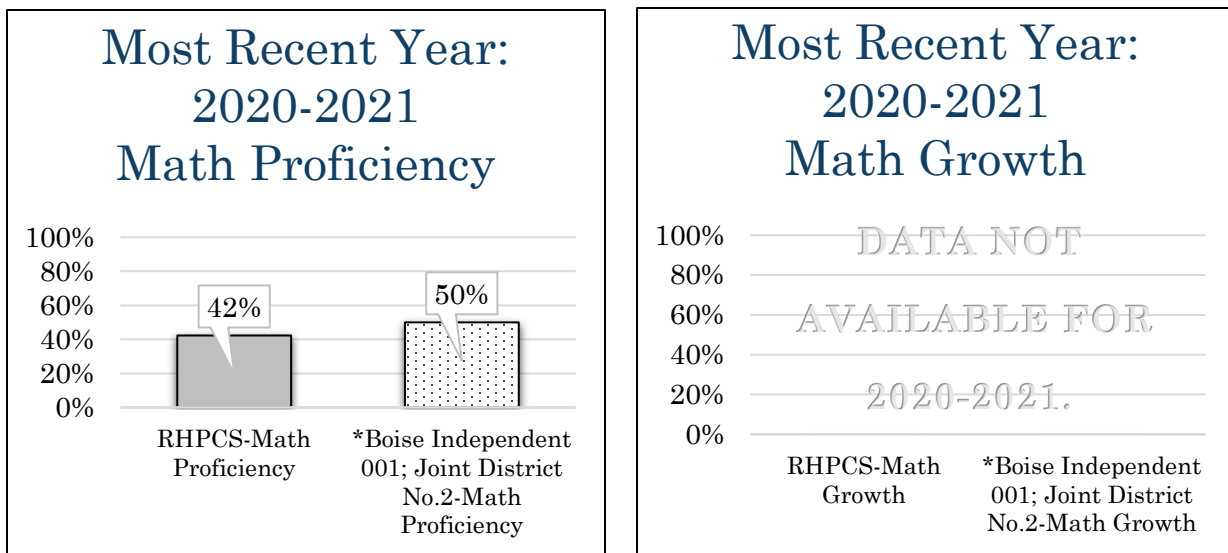

MATH PROFICIENCY & MATH GROWTH

Why This Matters:

The IPCSC must determine whether the academic performance at the school represents a favorable return on the investment of public dollars. For context, the IPCSC considers the school's performance in relation to other educational choices available to families. A school that performs as well or better than the average of its comparison group on the statewide mathematics assessment (ISAT) meets the IPCSC standard on both the math proficiency and math growth measures.

If this standard is not yet met, the school should focus its strategic planning on improving mathematics achievement outcomes to ensure the school will earn a next operational term. If the standard is met, strategic planning may focus on whatever data points will best establish and sustain an exemplary school of the specific model for which the school is chartered.

Why This Matters:

The IPCSC must determine whether the academic performance at the school represents a favorable return on the investment of public dollars. For context, the IPCSC considers the school’s performance in relation to other educational choices available to families. A school that performs as well or better than the average of its comparison group on the statewide ELA assessment (ISAT) meets the IPCSC standard on both the ELA proficiency and ELA growth measures.

If this standard is not yet met, the school should focus its strategic planning on improving these outcomes to ensure the school will earn a next operational term. If the standard is met, strategic planning may focus on whatever data points will best establish and sustain an exemplary school of the specific model for which the school is chartered.

Academic Outcomes

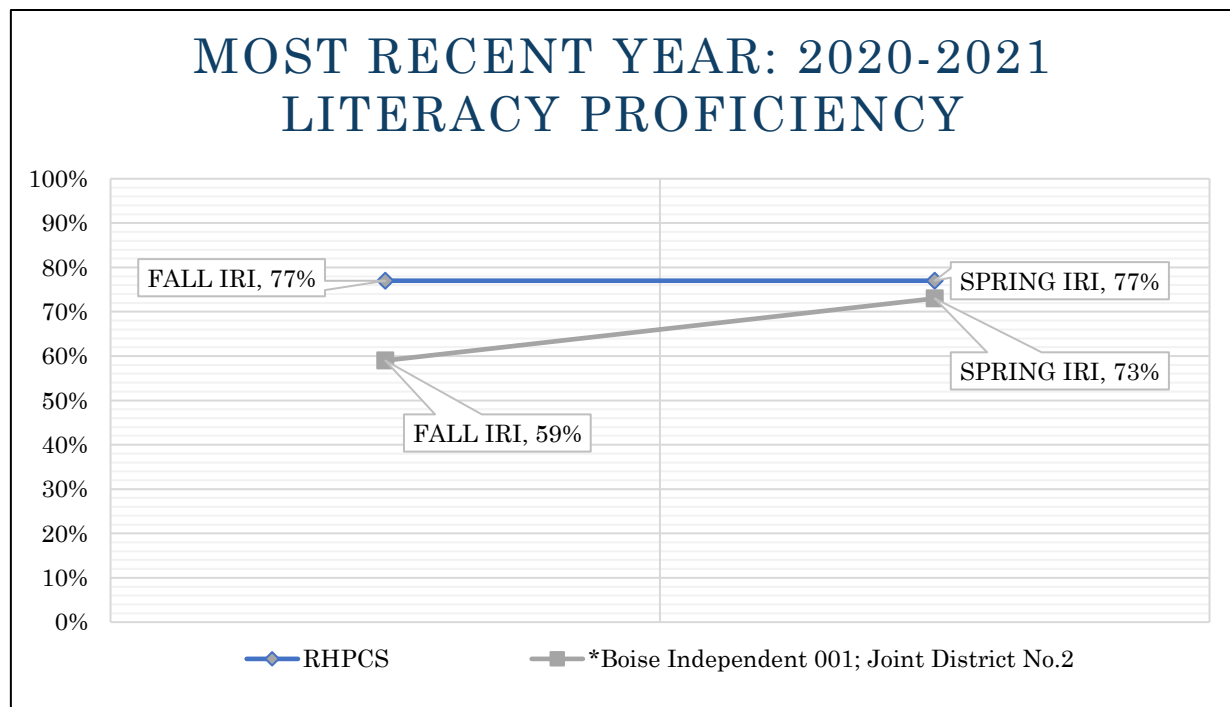

LITERACY PROFICIENCY

Why This Matters:

The IPCSC must determine whether the academic performance at the school represents a favorable return on the investment of public dollars. For context, the IPCSC considers the school’s performance in relation to other educational choices available to families. A school that performs as well or better than the average of its comparison group on the spring statewide literacy assessment (IRI) meets the IPCSC standard. Alternatively, a school that did not perform as well or better than its comparison group on the spring assessment, but that did improve its outcome by at least 10% from fall to spring, also meets standard.

If this standard is not yet met, the school should focus its strategic planning on improving these outcomes to ensure the school will earn a next operational term. If the standard is met, strategic planning may focus on whatever data points will best establish and sustain an exemplary school of the specific model for which the school is chartered.

BOARD STEWARDSHIP

Why This Matters:

At the highest level, the success of a charter school is driven by the ability of its governing board to govern effectively. The measures in this section help identify the strengths and challenges faced by the school's board. As success on these measures was not unduly influenced by the pandemic, ratings are applied for the 2020-2021 school year. *Please see the [Performance Framework Rubrics](#) for details regarding how each measure is rated.

Longitudinal Operational Ratings | 2018-2023

Board Stewardship

Longitudinal data provides a snapshot of a school’s ratings over the school’s current performance certificate (5 years). This data helps to identify performance trends and changes over time. Schools are encouraged to consider how this data might be used to drive your strategic planning as your school approach its next renewal decision.

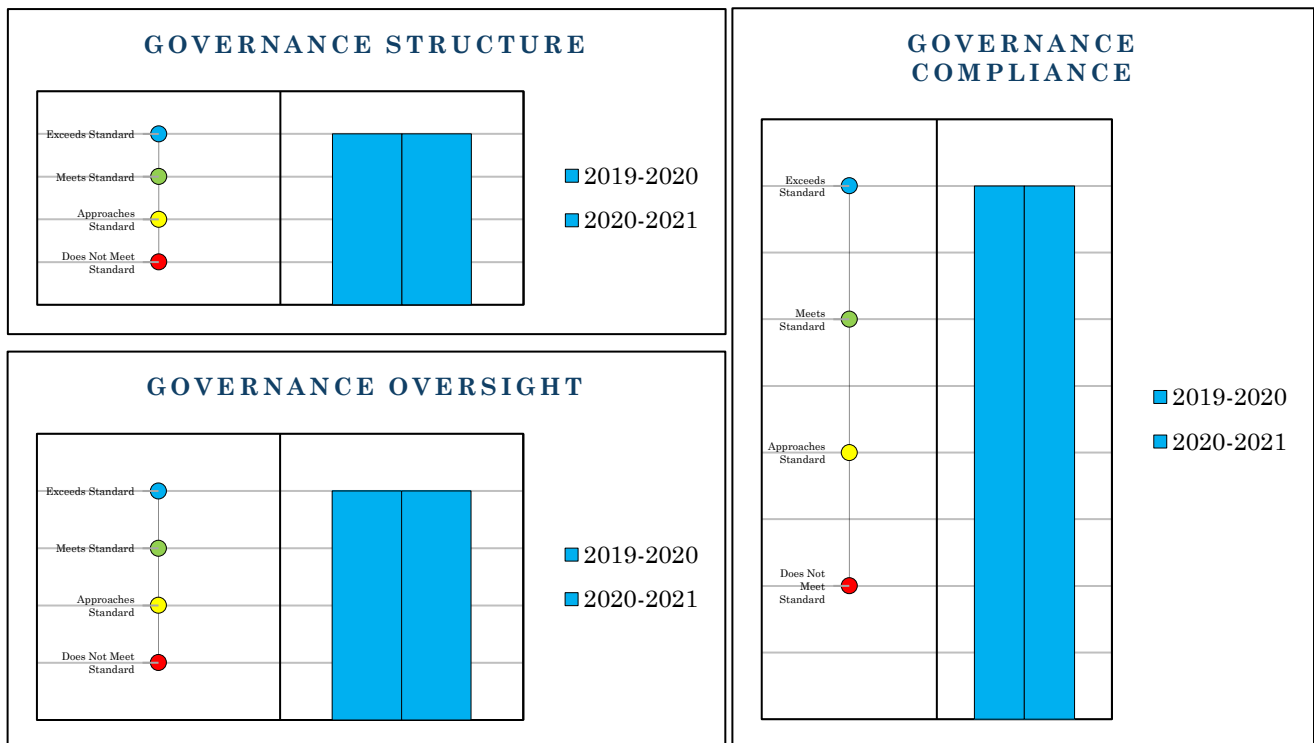

Ratings on the historical and revised framework are not comparable in the operational section. The two sets of data have been included. The school’s operational ratings on the historical framework are provided for reference.

Operational Ratings | Historical Framework

School Year	Rating
2018-2019	HONOR

Note: In 2020, the IPCSC reorganized these measures for clarity. Operational outcomes are now divided into two sections (board stewardship and management) based on the primary party responsible for the school’s success on each measure.

Financial Outcomes

NEAR TERM MEASURES

These measures evaluate whether a school is likely to meet its financial obligations in the next year. *Please see the [Performance Framework Rubrics](#) for details regarding how each measure is rated.

Current Ratio

The school has a current ratio of more than 1.5.	Current Ratio 10.33	Ratings Not Applicable for 2020-2021
--	---------------------	--------------------------------------

Why This Matters:

Current Ratio is a comparison of a school's financial obligations due within one year (current liabilities) to the cash and investments held by the school (current assets).

A school with more assets than liabilities (a Current Ratio greater than 1.0) would be able to meet its financial obligations for the

next year without relying on future revenue.

A school with more liabilities than assets (a Current Ratio of less than 1.0) is dependent on revenue it has not yet received to meet existing financial obligations.

Unrestricted Days Cash

The school has more than 60 days cash on hand	81 Days	Ratings Not Applicable for 2020-2021
---	---------	--------------------------------------

Why this Matters:

This measure estimates a school's average daily cost of operations and considers the number of days a school could operate using only its available cash and investments.

A school with at least 60 days cash on hand would be able to meet its immediate financial obligations with available cash, buying the time it might take to

access other current assets. Occasionally, a planned purchase may decrease this number temporarily. In those cases, 30-60 days cash on hand with an upward trend is acceptable. A school with less than 15 days cash on hand is in financial distress and is at risk of automatic closure.

Default

The school is not in default of any financial obligations and did not experience any instances of default during the fiscal year.	Ratings Not Applicable for 2020-2021
---	--------------------------------------

Why this Matters:

This measure identifies whether a school has defaulted on any of its financial obligations. Default can mean many things. Examples of default include: paying bills late, failing to make payroll, or inaccurately filing reports required for funding. Default can also include a failure to meet any additional requirements of long-term debt as established by the lender (such as meeting a specific enrollment target or maintaining a greater amount of cash on hand than the PCSC requires).

Any act of default can result in disruption of services, loans being called due, or funding that is inaccurate or withheld.

Enrollment Variance

The school achieved and sustained at least 95% of its projected enrollment during the most recent school year.	Enrollment Variance 98.81%	Ratings Not Applicable for 2020-2021
--	-------------------------------	--------------------------------------

Why this Matters:

The Enrollment Variance measure considers what percentage of a school's projected enrollment was achieved. As the majority of a public school's funding is generated by student enrollment, this measure reflects a school's ability to execute its budget to plan.

A school that achieves at least 95% of its projected enrollment will likely experience few bumps and may make minor adjustments. A school that achieves less than 95% of projected enrollment is likely to face budget challenges requiring more significant budget amendments and may be in financial distress.

Financial Outcomes

SUSTAINABILITY MEASURES

These measures help determine whether a school is likely to remain financially stable into the future.

Total Margin

The school's aggregated 3-year total margin is less than or equal to -1.5%.	CY Total Margin -9.19% 3-Year Aggregated -2.79%	Ratings Not Applicable for 2020-2021
---	--	--------------------------------------

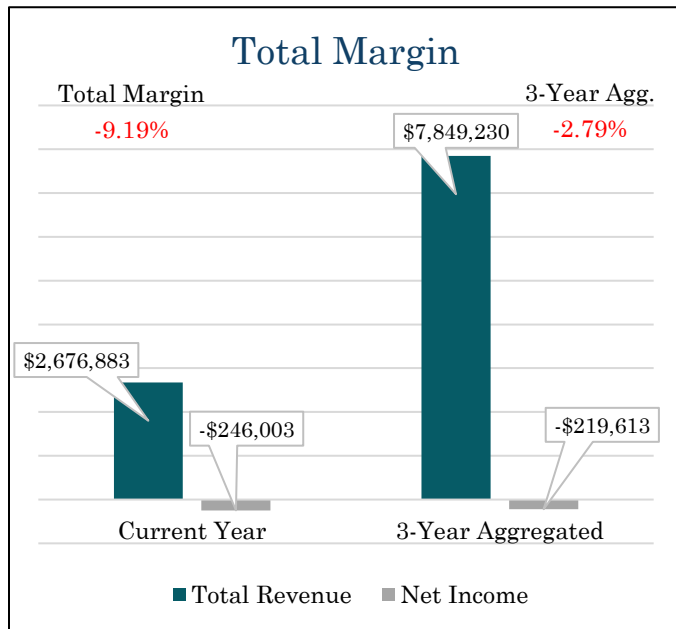

Why this Matters:

The Total Margin compares a school's total revenue to its net income. Specifically, this measure identifies what percentage of a school's total revenue in a given year was not expended during that year. A school with a positive total margin spent less than it brought in. That is, the school is living within its means and can plan for future purchases and investments.

An occasional negative total margin may indicate that a planned or necessary purchase has taken place. This is not necessarily a negative indicator.

However, if the Total Margin is chronically negative or severe decreases appear, the school may be in financial distress. Aggregating this margin over three years helps to identify these long-term trends.

Note: for the purposes of this calculation, pension liability is excluded from the school's net income.

Cash Flow

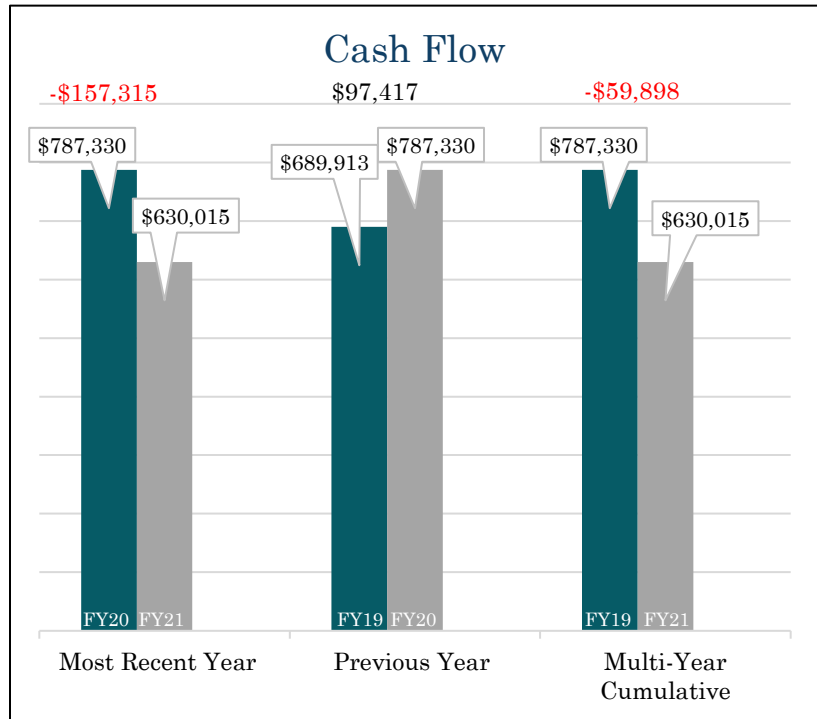

The school's multi-year cumulative cash flow is negative.	Most Recent Year -157,315 Previous Year \$97,417 Multi-Year -\$59,898	Ratings Not Applicable for 2020-2021
---	---	--------------------------------------

Why this Matters:

The Cash Flow measure considers the change in a school's cash balance over time. A school with a positive cash flow is increasing its reserves and is likely able to fund future projects and purchases.

A school with a negative cash flow is using its existing reserves to fund general operations and is not likely to have the financial flexibility to fund future plans.

A multi-year cumulative cash flow helps to identify long-term trends.

Debt Service Coverage Ratio

The school's debt service coverage ratio is less than .9.	Debt Service Coverage Ratio -0.53	Ratings Not Applicable for 2020-2021
---	-----------------------------------	--------------------------------------

Why this Matters:

This measure evaluates a school's ability to make payments on debt due in a given year using only that year's income. This helps determine whether a school has more debt than it can manage.

A school with more Operating Income than Debt Service (a Debt Service Coverage Ratio greater than 1) can meet the financial obligations of their debt. A

school with more Debt Service than Operating Income (a ratio of less than 1) is reliant on either reserves or revenues anticipated in future years to meet its debt obligations.

Debt to Asset Ratio

The school's Debt to Asset Ratio is less than 0.9.	Debt/Asset Ratio .49	Ratings Not Applicable for 2020-2021
--	----------------------	--------------------------------------

Why This Matters:

The Debt to Asset Ratio compares a school's total liabilities to its total assets. This helps determine whether a school would be able to meet both its short and long-term financial obligations.

A school whose total liabilities are 90% or less of its Total Assets is

likely to be able to repay all short-term debts and still manage to set its long-term affairs in order in a worst-case scenario. A school with more liabilities than assets would not be able to meet all its financial obligations in a worst-case scenario.

Note: for the purposes of this measure, pension liability is excluded from the school's total liabilities.

Financial Compliance

STANDARD RATING: NOT RATED FOR 2020-2021	
Financial Operations	Data and/or Evidence Source
The school's finances are managed in compliance with GAAP.	Financial Audit 10/29/2021

Longitudinal Financial Ratings | 2018-2023

Longitudinal data provides a snapshot of a school's ratings over the school's current performance certificate (5 years). This data helps to identify performance trends and changes over time. Schools are encouraged to consider how this data might be used to drive your strategic planning as your school approach its next renewal decision.

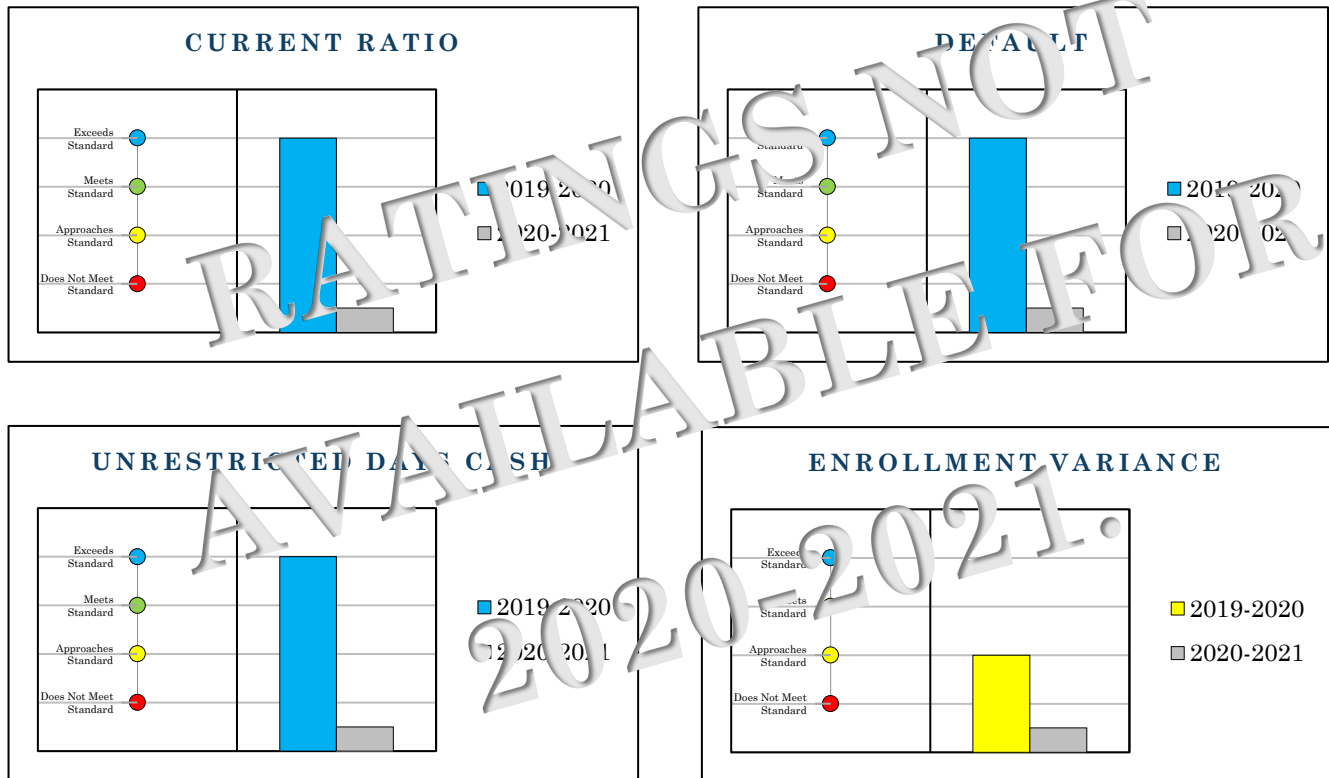

Notes: The 2020 framework revision removed the "cash ratio" measure and moved the existing enrollment variance measure to the financial section.

Due to the impact of the pandemic, financial outcomes are not rated for 2020-21. Additionally, the enrollment variance measure was calculated based on projected enrollment and actual enrollment (not ADA).
